

# Nemours<sup>®</sup> Children's Health System

Two full service  
children's hospitals: DE &  
FL

Care offered in DE, NJ,  
PA, FL and GA

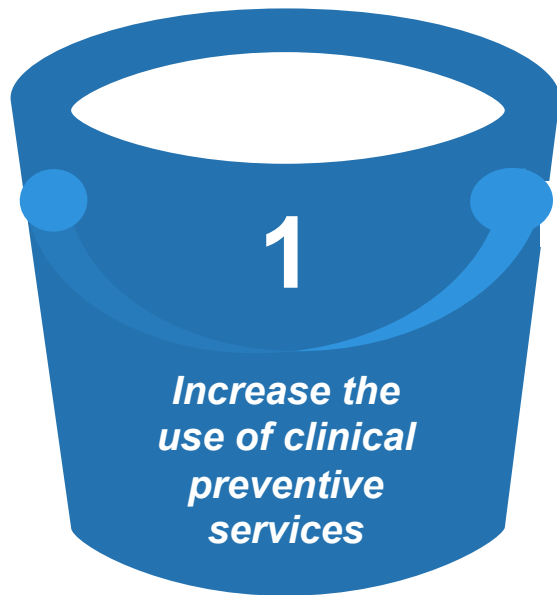

National work to help  
children grow up healthy

National Office of Policy  
& Prevention

# Prevention and Population Health Framework

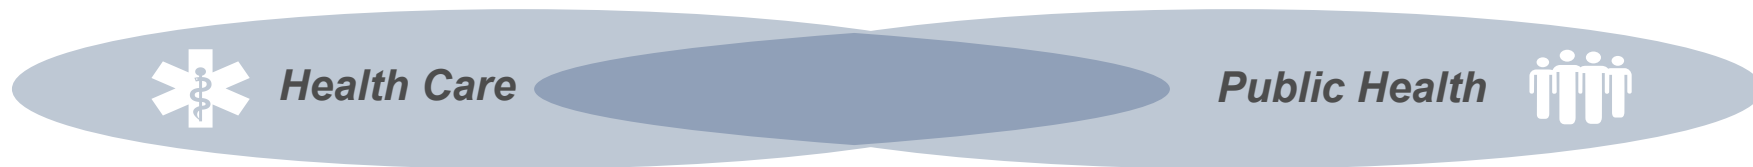

## Traditional Clinical Prevention

## Innovative Clinical Prevention

## Community-Wide Prevention

# Planning Your Work Targeting Non-Medical Determinants of Health: Considerations

1. Which bucket(s)?
2. What population(s)?
3. What measure(s)?
4. What mode(s)?

Examples from Nemours:

1. Early Care & Education Learning Collaboratives (ECELC)
2. Health Care Innovation Award work focused on asthma

# Early Care & Education Learning Collaboratives

## Which bucket?

- #3: Community-wide prevention- reaching whole populations

## What population?

- Infants and children from birth to age 5 who are enrolled at child care centers, via work targeting early care & education (ECE) providers and parents

## What measures?

- Adherence to best practices
- Dose, Cost, Cost/Dose/Impact
- Reach
- Saturation

## What mode?

- Training and technical assistance to ECE providers on best-practice guidelines for healthy eating and physical activity
- (Several variations being tested)

# Health Care Innovation Award (Asthma)

## Which Bucket?

- #2: Innovative clinical prevention- outside the clinical setting

## What Population?

- Children on the DE Asthma Registry

## What Measures?

- Reduced asthma-related emergency department use among pediatric Medicaid patients in DE
- Reduced asthma-related hospitalizations

## What mode?

### Community Health Workers:

- Home encounters with each family on asthma registry on an interval and as needed basis
- Conduct healthy home assessments
- Navigation of Health System and Access to Community Programs
- Asthma Assessment
- Asthma Re-Education (reinforce education as given by provider) on asthma and asthma management
- Data Collection

# Health Care Innovation Award (Asthma)

## Which Bucket?

- #3: Community-wide prevention-reaching whole populations

## What Population?

- All children (and other residents) residing in public housing in pilot sites

## What Measures?

- Reduced asthma triggers for all residents of pilot sites

## What mode?

Healthy Housing and Integrated Pest Management (IPM)

Pilots in Wilmington, Dover and Laurel to:

- Train residents of public housing sites to reduce asthma triggers in the home
- Train management team of each public housing site, as well as residential and housing authority leaders, in developing IPM plans
- Implement a train-the-trainer approach to train other local public housing managers and leaders in IPM
